DETAILED ACTION

1. The responses filed April 29, 2002 and May 7, 2002 have been entered. It is noted that in view of the new amendment practice under 37 CFR 1.121 which became mandatory for all amendments on March 1, 2001, and due to the limited amount of examining time per application, if the amendment contains changes to existing language that requires a marked-up version showing those changes, the Examiner is relying upon the marked-up version(s) for examination of the application. It is applicant's responsibility to ensure that the clean version(s) is (are) the same as the marked-up version(s). It is further noted that the clean version(s) is (are) considered to be the Official version(s).

Drawings

- 2. The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on April 29, 2002 have been **approved**. A proper drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The correction to the drawings will not be held in abeyance.
- 3. The drawings are objected to because in Figure 2, it seems that a notch would be present and should be shown on the hole through the center of the rotatable mounting 8 (e.g., see Fig. 3), and it is suggested to add a notch and a numeral therefor. A proposed drawing correction or

Application/Control Number: 09/549,130

Page 3

Art Unit: 3724

corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: 4.

On page 6, line 15, "shaft 13'" is inaccurate since it is describing the wrong shaft, and it seems that it should be changed to --5'-- or the like; also in lines 4-5, it seems that "9" in line 4 should be deleted and reinserted after "lug" in line 5, and a numeral should be added to represent the notch (which should be shown at least in Fig. 2 as described above).

Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. Claims 1-6 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 2-3, "tissue sections" is vague as to whether it refers to that in line 1 or other such tissue sections, and it seems that --said-- should be inserted before "tissue".

In claim 4, line 2, structural cooperation is not positively set forth for the positioning element, and it is suggested to delete "for" or the like; in lines 2-3, the recitation "by which

Page 4

Application/Control Number: 09/549,130

Art Unit: 3724

positioning element said cutting edges of said knife" is awkwardly worded and unclear as to what is being set forth.

In claim 5, lines 1-3, the recitation "wherein said knife holder has a detent for said shaft that latches said rotatable mounting" is vague and indefinite as to what structure is being set forth and appears to be inaccurate.

In claim 8, lines 1-2, structural cooperation is not positively set forth for the releasable stop, particularly with respect to the knife, and it is suggested in line 2 to delete "for" or the like.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 7. Claims 1, 3-6 and 8, as understood, are rejected under 35 U.S.C. 102(b) as being anticipated by French Publication 2 549 098 (hereafter FP '098).

FP '098 discloses an apparatus with every structural limitation of the claimed invention including a disc-shaped cutting knife (e.g., 1); and a knife holder with a knife receiver (e.g., 2, 21), the knife receiver having a shaft (e.g., 22) and a rotatable mounting (e.g., 7), wherein the

Page 5

Application/Control Number: 09/549,130

Art Unit: 3724

rotatable mounting has a positioning element (e.g., 8) and a detent (e.g., 15, which meets the claim limitations as best understood); and a releasable stop (e.g., 14).

Claim Rejections - 35 USC § 103

- 8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 9. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over French Publication 2 549 098 (hereafter FP '098).

FP '098 lacks the knife holder having a depression in which the knife is received. However, the Examiner takes Official notice that such depressions are old and well known in the art and provide various well known benefits including acting as a guard to protect portions of the knife which are not being used as well as safety benefits. Therefore, it would have been obvious to one having ordinary skill in the art to provide a depression in the knife holder of FP '098 for the well known benefits including those described above.

Application/Control Number: 09/549,130

Art Unit: 3724

Conclusion

- 10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Clark Dexter whose telephone number is (703) 308-1404. The examiner's typical work schedule is Monday, Tuesday, Thursday and Friday, and he can be reached during normal business hours on these days.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Allan Shoap, can be reached at (703)308-1082.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703)308-1148. The fax numbers for this group are: formal papers - (703)305-3579; informal/draft papers - (703)305-9835.
